Horsepower (DIN @ rpm)	240 @ 3,600	290 @ 6,400	360 @ 5,150

**Variable Valve Timing (VVT)** — VVT offers increased engine breathing throughout the rpm range by varying the degree that the valves open and close in conjunction with the piston position. Results are tangible: better performance, more efficient operation, and increased torque for towing and hauling (3.6L and 5.7L).

**Fuel Saver Technology** — Deactivates 4 cylinders (1, 4, 6, and 7) during steady-speed cruising, low acceleration, and shallow-grade climbing conditions (5.7L).

**Transmission** — Driver-interactive manual control via steering-wheel paddle shifters and electronically modulated torque converter clutch. (Standard on all models.)

## BODY/SUSPENSION

**Body Design** — UniFrame construction: all-steel body sheet metal and frame structural members welded and bonded into a single unit.

**Suspension** — Front: Short/long arm (SLA), coil springs, gas-charged, twin-tube coil-over shock absorbers, upper and lower control arms ("A" arms), and stabilizer bar  
Rear: Multilink rear suspension, coil springs, twin-tube shocks (including load-leveling for towing), aluminum lower control arm, independent upper links (tension and camber) plus a separate toelink

**Steering** — Power rack-and-pinion (V8) electro-hydraulic power steering (V6 and EcoDiesel)

---

- + **QUADRA-TRAC II<sup>®</sup>** offers low-range all-speed traction control that can quickly transfer power to the axle with the most traction.

---

- + **QUADRA-TRAC I<sup>®</sup>** is fully automatic, offering a continual balance of torque distribution; if slippage occurs, torque is transferred to the axle with the most traction.
